PROFESSIONAL SUMMARY

Experienced FIFO dump truck operator with 8+ years across Pilbara iron ore and Bowen Basin coal operations. Proven on CAT 793F, 789D and Komatsu 830E ultra-class haul trucks across day/night rotations. Strong track record of consistent production output, zero LTIs across 2,400+ shifts, and complete autonomy on remote-area mining haul roads. Inducted across multiple Tier-1 producers – immediately mobilisable. Recognised by supervisors for shift handover discipline, operating to TKPH limits, and proactive load communication with the dig.

KEY SKILLS & COMPETENCIES

- Ultra-Class Haul Truck Operations – CAT 793F (227t), CAT 789D (177t), Komatsu 830E (220t) on iron ore and coal hauls up to 4.5km cycle
- Production Discipline – Consistent 18-22 cycles per shift on long-haul circuits, operating to TKPH and load-target limits
- Pre-Start & Compliance – Comprehensive pre-start inspections, fault reporting, and shift handover documentation across multiple equipment types
- Safety Leadership – Take 5s, JHAs, SLAM, JSEAs, positive isolation procedures, and proactive hazard reporting with zero LTI record
- Two-Way Communication – Clear haul-road radio etiquette, dig coordination, and stop/start protocol with shovels and excavators
- Adverse Conditions – Wet weather, dust, night-shift, and emergency response operating including controlled load dump and runaway protocols
- Multi-Equipment Capability – Crossover experience on Liebherr T282 and CAT 785C as required for shift coverage and shutdowns
- Site Inductions – Tier-1 iron ore and coal producer site inductions current; mobilisable within 48 hours

LICENCES & CERTIFICATIONS

- C Class Manual Driver's Licence
- HR Heavy Rigid Licence
- Standard 11 Generic Mining Induction (Coal)
- Iron Ore Industry Site Induction
- CAT 793F VOC
- CAT 789D VOC
- Komatsu 830E VOC
- Working at Heights
- Confined Space Entry
- Senior First Aid + CPR
- Provide First Aid (HLTAID011)
- White Card (CPCCWHS1001)

PROFESSIONAL EXPERIENCE

FIFO Dump Truck Operator

March 2022 – Present

Tier-1 Iron Ore Producer, Pilbara WA

- Operated CAT 793F (227t) and Komatsu 830E (220t) haul trucks on rotating 2:1 day/night shift across high-grade iron ore production circuits

- Maintained an average of 19 cycles per 12-hour shift on a 4.2km haul circuit, consistently meeting daily production tonnage targets
- Achieved zero LTIs and zero recordable incidents across 1,400+ shifts; recognised by site superintendent in quarterly safety briefing
- Mentored three new starters through on-the-job VOC sign-off, reducing typical sign-off time by approximately one shift per trainee
- Maintained complete pre-start, hazard, and refuel logs with no documentation failures across two annual site audits

Haul Truck Operator

July 2019 – February 2022

Tier-1 Coal Producer, Bowen Basin QLD

- Operated CAT 789D (177t) on coal and overburden hauls across multiple active pits on a 2:1 even-time roster
- Completed shift production reports and assisted dispatch with cycle-time analysis to identify haul road bottlenecks
- Participated in monthly toolbox talks and contributed two safety improvements adopted as site-wide standard practice
- Maintained 100% attendance across the 30-month engagement with no shift cancellations or roster swaps requested

Trainee Haul Truck Operator

August 2018 – June 2019

Mining Labour Hire, Pilbara WA

- Completed Standard 11 induction and on-site VOC sign-off for CAT 785C and 789D haul trucks within scheduled 14-day training program
- Progressed from trainee to fully autonomous operator within four months – ahead of typical six-month progression for first-time miners
- Built foundational shift discipline including pre-start inspections, refuelling procedures, and radio protocol on active production circuits
